Motivated and enthusiastic Computer Science graduate with hands on experience in full stack web development and building practical software solutions. Passionate about building user friendly solutions, problem solving, and continuously learning modern software development technologies.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

APJ Abdul Kalam Technological University

Aug. 2023 – Jun. 2027

SKILLS

Programming Languages: Python, JavaScript, SQL

Web Development: Flask, HTML, CSS

Databases: MongoDB, MySQL, SQLite

Version Control & Tools: Git, GitHub, VS Code

EXPERIENCE

CodeCraft Bootcamp

Jun. 2025 – Jul 2025

Full Stack Web Development

- Built dynamic web applications using Python, Flask, SQL, HTML, CSS and JavaScript.
- Developed responsive user interfaces and integrated backend functionalities.
- Implemented database design, CRUD operations and user authentication features.
- Applied version control practices using Git and GitHub for project management.
- Collaborated on hands on projects to strengthen full stack development and problem solving skills.

PROJECTS

GymFlow

Feb. 2026 – May. 2026

Technology: Python, Flask, MongoDB, HTML, CSS, JavaScript, Git, GitHub

Repository : github.com/annusiby5/gym-flow

- Developed a full stack fitness management platform for tracking workouts, monitoring health progress, setting fitness goals and improving overall wellness.
- Implemented secure user registration and login functionality.
- Designed personalized fitness tracking and workout management features.
- Integrated MongoDB for efficient storage and retrieval of user data.
- Added women focused health features, including period tracking and wellness monitoring.
- Created a responsive and user friendly interface for easy accessibility across devices.

AquaQuest

Jun. 2026 – Jul. 2026

Technology: Python, Ren'py, Photoshop, Audacity, Git, GitHub

Repository : github.com/annusiby5/aqua-quest

- Developed an educational visual novel game on water conservation.
- Created interactive, choice based gameplay and storylines.
- Implemented game logic and user interactions using Ren'py.
- Designed and integrated visual and audio assets.
- Promoted awareness of sustainable water management practices.

FlaskCMS

Jun. 2026 – Jul. 2026

Technology: Python, Flask, SQLite, HTML, CSS, JavaScript, Git, GitHub

Repository : github.com/annusiby5/flask-cms

- Developed a full stack contact management system using Flask.
- Implemented user authentication, contact management, and search functionality.
- Built responsive interfaces with pagination and real time notifications.
- Enabled secure account management, including profile updates and deletion.
- Designed an intuitive user experience for efficient contact organization.
